Life Changing Summer Experiences

Praises

Recent opportunities to share the gospel with children

On Halloween, we passed out over 75 booklets with a gospel message for children.

Jeff had the opportunity to share the gospel with over 30 children in our church's AWANA club. Please pray that God will work in the lives of children in our neighborhood and AWANA club.

Prayer Requests

Summer Projects

We are trusting God to send over 3000 students to locations around the world this summer. Pray for students as they are making decisions about how to invest their summer.

Outreach on College Campuses

Please pray for the outreach efforts of our 1195 movements nationwide. Pray that God would draw students to himself and that lives would be changed this fall. It was 19 years ago this month that Jeff was reached for Christ as a freshman at the University of Kansas.

Each summer, Campus Crusade give students the opportunity to change both their lives and the world by participating in Summer Projects. These 1 to 10 week projects provide a greenhouse environment of personal spiritual growth and ministry training.

This past summer, nearly 2,800 students participated in 140 different summer projects in the U.S. and around the world. As a result, **over 35,000 people heard the gospel message and 2,802 indicated decisions for Christ.**

Jeff participated in his first summer project in San Diego over 16 years ago. It stretched his faith as he shared his faith on the beaches of California and saw God work in his life and the lives of the 50 other students on the project.

It was while in San Diego that Jeff caught a greater vision for the world which led him to go to Hungary the following summer. Summer projects were foundational to both of our decisions to serve full-time with Campus Crusade for Christ.

Last April, Jeff started working with the Summer Projects design team to redesign the website that promotes these summer opportunities.

We wanted to create more visual appealing site that communicates the fun and excitement of the Summer Project environment. We also wanted to highlight the breadth of opportunities that are available. From launching new ministries on campuses in the U.S. and worldwide, to projects with an artistic focus, to projects

Jeff played a big part in the redesign of the website for Summer Projects. Though, Jeff did not design the site, his fingerprints are all over it, including the idea of an interactive map that allows students to explore different Summer Projects locations around the world .

focused on athletes and medical professionals, students have many diverse options.

On October 16, we launched the new website. The new design includes pictures of student on past summer projects. The site is filled with quotes and stories of students' experiences on past projects.

Jeff helped to shape the direction of the site and suggested some interactive elements that would enhance the experience for those who visit. One of the elements is an interactive map that allows students to explore the different project locations in the U.S. and around the world.

We are trusting God for over 3,000 to go on summer projects this year. You can visit the website at <http://gosummerproject.com>.
